Going Green

H & H Pools Going Green

The Green Factor

Two speeds are better than one. Low speed consumes less power while still providing filtering and heating. High speed allows fast turn over of water for cleaning and skimming.

Whisper Flo 2 Speed

- Oversized strainer basket and volute
- Lower hp's deliver higher performance than industry standard
- Compatible with all cleaning systems, various filters.
- Heavy-duty/durable construction is designed for long life.
- Whisper Quiet
- New motor increases life, energy, efficiency, ease of installation and better cooling for long service life

30" Tagelus® Filter

- Superior flow characteristics and long filter cycles for economical operation
- Combination water & sand drain makes servicing and winterizing fast and easy
- Flow Rate of up to 100 gal minute allows faster turnover of water making a great companion to the Whisper Flo pump and In Floor Cleaning system.
- Filtration and circulation system engineered to provide superior performance, longevity and lifetime value.

The Green Factor

More Media area means less back washing to clean the filter. A typical back wash uses between 250 and 1,000 gallons of water. Less water loss, less chemical loss and better cleaning.

The Green Factor

Reduce emissions from chemical processing plants. Transportation emissions are also reduced and helps protect the environment from accidental toxic chemical spillage.

Electronic Chlorine Generator Kit

- Automatic chlorine generation using ordinary table salt
- Programmable super-chlorinate function
- 20,000 and 40,000 gallon cells available
- Produces up to 1.45 lbs. of chlorine per day

Going Green

The Green Factor

By Automating and synchronizing equipment scheduling, control systems can optimize energy use and equipment performance while preventing problems and waste.

Automation

Comprehensive Array of Functions in a User-Friendly Format

- Automate cleaning cycles and heater settings.
- Programmable group functions allow multiple features to be controlled from a single button.
- Controls filter pump and up to 15 auxiliary high-voltage functions.
- Controls heater and solar.
- All functions fully programmable.
- Virtual programmable group control.
- Controls 2-speed and booster pumps.

Non Toxic Chemical Program to fight Algae Growth

- No phosphate build-up = no algae guaranteed
- Greatly reduced pool maintenance
- No waterline rings or strong chemical odors
- Makes water feel soft & silky
- Enhances any sanitizer program
- Non-toxic and 100% safe for your family and the environment!

The Green Factor

Non-toxic chemicals do not harm the environment in case of accidental spillage. Near zero phosphate levels increase efficiency of the salt generator!

The Green Factor

LED Pool and Spa Lights are the most efficient Pool and Spa lighting available. Plus they can last 30,000 hours or more, minimizing replacement cost and disposal

LED (*Light Emitting Diode*)

- Use only 50 Watts.
- Life of LED is approximately 30,000+ hours compared to 5,000 hours.
- Cool running LED lights are durable solid state technology.
- Continues to work even if a single LED fails.

Going Green

Smart Mesh Safety Covers

• Until now pools with mesh covers have had a tendency to open up looking more like a frog pond than a pool! Each season, pool owners pull off their mesh covers and go to work trying to get their pools clean and clear enough to swim in. Sometimes this process can take weeks and cost hundreds of dollars.

The Green Factor

Less algae means less toxic chemicals needed to get pool cleaned in spring, Fuel to transport the chemicals, chance of accidental spills and the list goes on.

• SmartMesh provides 100% shade from the algae causing rays of the sun, while still allowing rain and melting snow to pass through the cover material.

• SmartMesh filters debris as small as 40 microns. To give you a comparison, a typical sand filter for a pool filters debris as small as 20 to 30 microns. SmartMesh is like having a filter over your pool!

Merlin Liners

- Provide Extra U.V. Protection.
- Antibacterial protected.
- 100% Virgin Vinyl for long lasting fit.

Now, a new option from Merlin Industries, comes Aqua-Max vinyl liners. Aqua-Max liners are specially formulated to provide greater Ultraviolet resistance to today's pool chemical systems and occasional chemical misuse.

The Green Factor

U.V and antibacterial protection helps the liner from fading and cracking. A longer lasting liner means less replacements over the life of the pool producing less trash.

Aqua-Max vinyl liners are truly a better vinyl liner.

Going Green

Optional Going Green Components

Vanquish In Floor Cleaning

1. Warm, clean water is pumped to a patented, Six-Port Water Valve, a non-electric controller that efficiently distributes water to all areas of the pool and spa. Your pool is divided into six separate cleaning zones, which are turned on and off by the Six-Port Water Valve. Each cleaning zone has computer designed nozzles located within it to guarantee a high pressure jet of water, blasts away all dirt and debris in its path. One by one, the Water Valve delivers filtered water to each zone of the pool, automatically moving dirt and debris to the drain and skimmer to be removed. Down jets, from the patented Vanquish debris collection zone, push debris to the main drain where it is removed or collected in the deck mounted canister for convenient disposal. Dirt and other water born impurities are removed from the water by the filter, completing the cleaning cycle.

The Green Factor

Strategically placed nozzles circulate pool water evenly throughout your pool, save as much as 50% in heating costs. Additionally, other pool cleaning systems require an additional pump consuming more energy.

Automatic Pool Covers

- H & H exclusive Touch Pad Control, no more keys to lose!
- Under Track Design keeps pool deck clear of obstructions.
- Outstanding coated vinyl cover includes thermal retention and chemical resistant webbing.
- Safe! - Meets the highest safety standards, supporting over 450 pounds.

The Green Factor

Stops heat, water and chemical loss to the open air. A covered pool will retain heat better than a non covered pool. Other benefits will reduce water and chemical loss due to evaporation.

The Summer Fun Guys

Relax, Stay Fit, Stay Cool

No further than your backyard!

The Difference

is our Standard Equipment

Energy Efficient 2
Speed Pump

30 " High
Flow Filter

Heaters upgraded
to Cupro Nickle

Color LED
Lights

Salt Generator
and Automation
w 5yr warranty

Pool Side
Remote

Rocky's Roller
Solar Reel with
a 24' tube for
added stability

and Basket
Ball Anchors

The Difference...

is our Full Service Department providing service after the sale

is our 3Year Warranty on Pumps, Filters and Lighting

is our Free Openings and Closings for 3 Years (excluding chemicals)

is our online store for convenient access to pools supplies and accessories

About Us,

In 1976, once completing college, Randy Hardell went right to work for a major in-ground pool firm in Madison, WI. Little did Randy know that this would be the foundation of bigger things to come!

After 14 years of gaining knowledge and experience, Randy made the decision to go out and start his own company. In 1990 H & H POOLS & SPAS was born! Throughout the years, previous experiences taught him just what it would take to be successful in this business...starting with RELIABILITY and SERVICE. With these two things in mind, Randy knew that the rest would just follow...building pools.

Now with two retail locations and over 30 years in the pool and spa business, Randy is dedicated to providing the level of service that it takes to stay on top of today's technology. His experience not only dictates what will work but also what's worth the difference. To further complete your level of satisfaction, he added friendly, hardworking pool installation crews! Their committed approach insures that every phase of each pool project is done with efficiency and simplicity to their pool and spa clients. With this type of dedication it's no wonder that Randy and his crews can have your pool completed in less than a week...and keep you dedicated for years to come.

Over the years H & H POOLS AND SPAS has grown to be one of the premier pool builders in South Central WI. Being a leader of such a demanding industry is never easy. We pride ourselves in the way we keep it easy for you, our valued clients! It is our goal to continually research the quality of products that make owning and maintaining pools hassle free. Giving you more free time to enjoy your swimming pool with your family and friends is our constant mission!
